

Dr. Michael von Wagner

is a consultant for internal medicine and senior physician in the Department for Gastroenterology at the University Hospital Frankfurt.

His work focuses on process management, IT-solutions for clinical decision support and therapeutic options in the treatment of viral hepatitis.

In 2007, Dr. von Wagner pioneered patient management at the hospital, including structured planning of patient admission and clinic resources, patient administration and coordination of discharge. Based on these experiences in 2014 a Department of Central Patient Management was founded for the whole university hospital as well as a staff section of the Executive Board of the University Hospital Frankfurt which is headed by Dr. von Wagner.

Dr. von Wagner is also Key User of medical IT-Systems including standardization of medical documentation and consultancy in purchase.
